Lab Assignment 04: Conditional Statements, Loops, and File Handling

Course Name:	Operating System Lab	Course Code:	CS11303 11	Credit Hours:	4(3+1)
Course Instructor/s:	Muhammad Afnan	Program Name:	BS Software Engineering		
Semester:	BSSE – 6S,6T	Batch:			
Assignment No	4	Maximum Marks:	20		

Instructions:

- *Understanding of problem is a part of the assessment, Read each question completely before answering it.*
- *There is a ZERO tolerance policy for plagiarism. Assignments found with copy-pasted material or copied from fellows will be marked as ZERO.*
- *Answer all questions with working shell scripts.*
- *Each question carries 5 **marks** (Total: 20 marks).*
- *Make a single word/pdf file and submit all scripts with code and screenshot of output.*
- ***Due Date:** Tuesday, 21th May, 2026 11:59 PM (no late submissions accepted)*

Question 1 — Marks: 5

Write a shell script that asks the user to enter the name of the directory and the destination path; and then creates a directory at the given destination. Also display a success message along with the list of directories only.

Question 2 — Marks: 5

In this task, re-write the cp command in such a way that your script asks the user to enter the path of files to be copied and the destination path; and then copies all of the files to the destination. Also display a success message along with the list of directories only.

Question 3 — Marks: 5

Write a shell script that takes a file path and a search string as input; and displays all of the lines that contain that string.

Question 4 — Marks: 5

Write a shell script that takes a list of text files as input and merges all those files into a single file; and displays its contents in the less application.

Submission Guidelines:

- Submit a single PDF file containing all scripts
- For each question include:
 - The complete shell script code (Screenshot)
 - Screenshot of the output
- Name your file: `Name_RollNo_LabAssignment4.pdf`
